Jared D. Ashman

Personal Profile

Reliable, adaptable to new environments, and excellent at staying on track with any task. Enthusiastic and approachable, yet consistently focused and on-topic. Organized, thorough and sure to finish any task correctly and on time. Tech savvy, and comfortable learning new programs as well. Precise, yet patient with explaining methods and processes to others.

Summary of Personal and Professional Skills

- Works well in teams
- Excellent problem solver
- Well versed in C++, Java, Javascript, and front-end development
- Familiarity with Microsoft Office Suite
- Experience with embedded systems / microcontrollers
- Oral and written communication

Professional Experience

- UCLA Undergraduate Admissions IT Specialist, September 2025 to January 2026
  - *Description: Provided technical support for UCLA Undergraduate Admissions. Maintained computer hardware while deploying and managing software updates for a network of over 100 stations. Ensured reliable performance and data security by providing routine maintenance and troubleshooting. Also maintained UCLA Undergraduate Admissions website through frequent updates and troubleshooting for day-to-day operations.*

- Minim Co-Founder and Tech Lead, June 2023 to July 2025
  - *Description: Worked with classmates and colleagues to found a nonprofit oriented around providing music tutorage to underprivileged kids in a local area. Single-handedly coded a website using native HTML (Hypertext Markup Language), CSS (Cascading Style Sheets), and JS (Javascript), and launched the website in partnership with nonprofit Hackclub under minimsd.org.*

Projects

- Underwater Robot: Built an underwater ROV from scratch, designing everything from microcontroller firmware to hull structure and underwater testing.
- Dart-Launching Robot: Built an omni-wheeled robot with the ability to launch darts, which required aerodynamics testing and a web-based U.I. implemented using a local server.
- **(Current)** PiLight: Using a Raspberry Pi in conjunction with an Arduino UNO to interpret analog signals and extract frequency and volume to control lights.

Education

- Currently pursuing a B.S. in Computer Engineering at UCLA with a 3.9 GPA
- Computer Vision Simulation Manager – BUR (Bruin Underwater Racing) Software Team
- University City High School, Salutatorian (2025) – San Diego, CA
